

Over 300% ROI for OneLayer Private 5G/LTE Device Security and Management Solution

Return on Investment (ROI)

315%

Devices:200,000 | 2023

OneLayer Bridge is designed to provide seamless and secure connectivity between enterprise cellular networks and IT/OT networks. OneLayer helps organizations unlock greater business value from their investments in private cellular networks in several critical ways:

Improve Cybersecurity Management Efficiency and Effectiveness

Zero-trust security with real-time visibility and auto policy enforcement.

- Improved efficiency for policy management and incident response.
- Minimizes costs and reputational damage from security breaches.
- Avoids costs of unnecessary firewall and network hardware.

Reduce costs by 80%

Optimize Network Operations, Performance Management, and Uptime

Pinpoints and resolves device and network performance issues faster, Increases availability.

- Reduces operational costs through process automation.
- Reduces software, hardware, log storage, and system administration costs by avoiding unnecessary on-premises infrastructure.

Reduce costs by half.

Increase Supply Chain Efficiency

See which devices are deployed and where. Implement cost-effective inventory strategies.

- Reduces asset management costs and complexity.
- Minimizes inventory costs by maintaining optimal device and device parts inventory in suitable locations.

Reduce costs by 80%

Develop Specialized Organizational Knowledge and Skills

Talented security experts who are also cellular experts are rare and expensive resources.

- Reduces the cost of recruiting specialized cellular security experts and training costs.
- Minimizes dependency on 3rd-party consultants by empowering in-house resources with the tools to succeed.

Reduce costs by 60%

Simplify Regulatory Compliance

Provides visibility and control to extend compliance strategies to cellular infrastructure.

- Eliminates exposure to possible fines of millions of dollars.
- Simplifies adherence to security regulations and standards with granular cellular policy controls.
- Provides evidence of compliance with service level agreements through detailed tracking and traceability.

Reduce costs by a third.
